

SUPPLEMENTARY DATA

## **Alteration of Metabolic Profile and Potential Biomarkers in the Plasma of Alzheimer's Disease**

**Yaping Shao<sup>1,2</sup>, Yang Ouyang<sup>3,4</sup>, Tianbai Li<sup>1,2</sup>, Xinyao Liu<sup>1,2</sup>, Xiaojiao Xu<sup>1,2</sup>, Song Li<sup>1,2</sup>,  
Guowang Xu<sup>3\*</sup>, Weidong Le<sup>1,2\*</sup>**

# SUPPLEMENTARY DATA

**Supplementary Table 1.** Statistical results of correlations between the five selected metabolites and MMSE/MoCA.

		CA	CDCA	Allocholic acid	Indolelactic acid	Tryptophan
MMSE	r	- 0.172	- 0.189	- 0.062	- 0.135	0.166
	<i>p</i> value	0.470	0.425	0.794	0.569	0.485
MoCA	r	- 0.077	- 0.172	0.045	- 0.172	0.148
	<i>p</i> value	0.748	0.713	0.849	0.468	0.533

Based on Pearson correlation analysis. r: correlation coefficient; MMSE, Mini-mental State Examination; MoCA, Montreal Cognitive Assessment.
