Supplementary Figure 1. MiR-29a-3p was negatively correlated with TNF-alpha plasma levels in ARDS patients and ALI model mice. (A) The correlation between miR-29a-3p expression and the TNF-α plasma levels in ARDS patients (N=15). (B) The correlation between miR-29a-3p expression and number of leukocytes in ARDS patients (N=15). (C) The correlation between miR-29a-3p expression and the TNF-α plasma levels in ALI model mice (N=8).
