[Received March 24, 2025; Revised March 25, 2025; Accepted March 26, 2025]

In our article “P-Glycoprotein Aggravates Blood Brain Barrier Dysfunction in Experimental Ischemic Stroke by Inhibiting Endothelial Autophagy” published in the October 2022 issue of Aging and Disease [Aging Dis. 2022 Oct 1;13(5):1546-1561], we have noted some inadvertent errors. The immunofluorescence staining

images of Occludin/DAPI and ZO-1/DAPI in the P-gp pcDNA3.1 group were incorrectly presented in Figure 6E due to an oversight during the figure preparation process. We have attached the correct Figure 6, ensuring the accurate depiction of the data.
